EIS002201

MS. TREICHEL: Judy Treichel, Nevada Nuclear Waste Task Force.

As a person who works probably about fourteen or fifteen hours a day on this specific issue and spends all of that time trying to keep up, I feel fairly comfortable in coming up here, but I know how difficult it is for people as it was mentioned, people who are not doing this, are not able to do this for whatever reason.

Therefore, much of what you've heard and what's going to be on the transcript that you're getting this morning, the one you're going to get tonight and probably both tomorrow will be out of the scope of what you're talking about.

Those things can't be just cast off, and tough luck for people who didn't know what to say while they were here.

1

It's my request, and it's a formal one on the record, that this transcript and the others be submitted by you as EIS comments for the -- because these hearings will be over within that comment period, and I believe that you need to submit those because there was such confusion created by the Department of Energy -- I'm not saying it was intentional, but it certainly was confusion to mix these two things up, and that has to happen.

So -- there was one other thing, but it slipped my mind.

Thank you.
